NATIONAL MECHANICALLY SEPARATED CHICKEN (F.O.B. Shipper Dock or equivalent; negotiated prices in trucklot and less-than-trucklot volumes reported in thousand pound quantities, cents/pound; delivery within 2 weeks.)

Prices on all fat contents of MSC are trending mostly steady to weak. Demand into domestic and export channels is mostly light to instances moderate. Supplies are mixed ranging light to heavy for current buyer needs. The marketplace is typical of the holiday season with varying production and further processing schedules amongst both sellers and buyers. Spot MSC and frames are a challenge to sell, which is further compounded by trucking availability and expense. Contract negotiations for 2015 persist for some, especially for export. Prices have been confirmed on either a formula basis or as flat prices at similar to lower levels than 2014. Market activity is slow to moderate. Raw material supplies are moderate to heavy. Prices of frames are steady to weak with trading levels between 9-14 cents FOB, mostly 9-11 cents FOB.
