

The weekly report, *USDA, Dairy Market News*, will next be released on Friday, November 1, 2013.

Dairy Market News (DMN) resumed operations on Thursday, October 17. Due to time and logistic constraints, DMN was not able to collect dairy market information, analyze data, and provide market commentary, in a manner necessary to provide accurate and timely, first-hand reports to the dairy industry.

Individual market reports will resume and will be available at the DMN website at:

<http://www.ams.usda.gov/AMSV1.0/dairymarketnews>

Historic information can be found at the DMN Portal at: <http://www.marketnews.usda.gov/portal/da>
