NASS issued their July acreage report this week. Overall bean acres are up 29 percent. North Dakota has the largest increase at 59 percent. See page 4 for a breakout of each state. North Dakota is reporting very wet conditions with below average temperatures. They are forecasted to be much warmer later in the week into the weekend. This is raising concerns about how the crop will handle the wet soil conditions and quick spike in temperatures. All other regions are mostly reporting moderate to good crop conditions.
