Grain and Feedstuffs Market Trend

Compared to two weeks ago: Feed corn demand and trade activity good, trading 19 cents lower FOB. Prices firm in the upper Midwest and Northeast. Feed grade soybean demand good on light to moderate activity. Forward contracting beginning on new crop food and feed grade soybeans. No trend available on food and feed grade wheat, but firm undertones noted on light trade activity. Demand good for feed wheat and barley in the Pacific Northwest. Organic dry edible bean contracts are being negotiated with prices steady to slightly higher compared to last year. No trend available on all other organic grains and hay due to a lack of comparable trades.

Current National Drought Summary (February 6, 2018)

During the 7-day period (ending Tuesday morning), near- to above-normal precipitation was observed from the interior Southeast into New England, while dryness intensified across the southern half of the Plains and much of the southwestern quarter of the nation. Drought continued to expand on the southern Plains, while a reduction in drought intensity and coverage was noted in parts of the south and east where rain and snow were heaviest. The situation across the western U.S. presented sharply diverging scenarios, with good season-to-date moisture supplies across the northern Rockies and Pacific Northwest in sharp contrast to intensifying drought and a lack of vital snowpacks across central and southern portions of the Rockies and Sierra Nevada.
