Grain and Feedstuffs Market Trend

Feed grade corn demand good, trading 48 cents lower as feed mills continue to fill positions getting to new crop. Forward contracting active. Feed grade soybean demand and activity very light. No forward contract activity. Soybean meal trade too limited to trend, but steady undertones noted. Food wheat demand and activity light with prices reflecting SRW, HRS and SWW. Feed wheat demand and activity light. Trade inactive on food and feed grade barley, oats, rye, sorghum, triticale, and millet. Limited activity on organic dry edible beans. Reports of high moisture corn delaying harvest. The NASS National Crop Progress Report for week ending 10/08/17, shows corn harvested 22%; soybeans harvested 36%; sorghum harvested 35%; winter wheat planted 48%, emerged 25%.

Current National Drought Summary (October 3, 2017)

A cold front approached the Eastern Seaboard early in the drought week, which drove Tropical Storm Maria farther away from the mid-Atlantic coast, keeping substantial impacts to a minimum. About the same time, the western edge of this cold front moved through southern Texas and New Mexico, bringing significant upslope precipitation (0.5-3.0 inches, locally greater) to the southern Great Plains and adjacent Rockies. Another cold front then moved southeastward out of central Canada, accompanied by primarily light precipitation (0.75-inch or less) to the Great Lakes region and Northeast. Towards the end of the drought week, yet another cold front progressed eastward across the Rockies, and the northern halves of the Great Plains and Mississippi Valley, bringing 1-2 inches of rain to much of the region.
